Experience

Intern Software Developer

Habsida • Seoul, South Korea

09/2024 - 11/2024

During my internship at Habsida, I worked extensively with React.js, enhancing my skills in responsive design and dynamic component development. I began by familiarizing myself with the existing codebase and completed several tasks including:

- Building mobile-responsive components with dynamic data.
- Implementing a dynamic tab menu for user reviews and frequently asked questions.
- Creating a star rating component that supports both full and half-star ratings.
- Developing a product carousel displaying items with prices and details.

Additionally, I self-taught Next.js during the internship and successfully developed a company template website following a provided design.

- Assisted in development of new product features, contributing to user-friendly experience.

Front End Developer

Atom IT • Tashkent, Uzbekistan

07/2022 - 08/2022

- Worked with REST API
- Created form panes for transactions of students
- Migrated project to Vue 3 from Nuxt.js

Front End Developer Intern

Wasaf Inc. Solutions • Tashkent, Uzbekistan

04/2022 - 07/2022

My primary focus is on the Frontend and I have worked on the following projects:

Zehniyat, Start-up project It is an online store where you can buy and read books of various genres

Worked with REST API, skeleton loader, creating loaders, optimizing website's performance from 12 seconds to 8 seconds

Tech stack: Vue 3, SASS

Elon.uz (alternative to oX.uz) You can advertise any ad through this site

Worked with responsiveness, REST API, creating layouts, reusable components

Unable to include code as it's in a private repository

Tech stack: Nuxt.js, Windi CSS

Implemented websites, landing pages, and applications from concept through deployment, with a responsive design

Collaborated closely with other team members on the development team

Performed code reviews

Optimized the user experience
